1. Icesamples STN leg 1+2

- a. The icesamples sent from Svalbard to Canada are still in Oslo. The shipping company is looking for a solution. Otherwise we will have them sent to DK and ERF will take care of it. The problem seems to be that the sea freight lines only take "full load" and we don't want to pay for a full container.

2. Cargo in return from STN

- a. ERF are doing DG docs for the chemicals coming home from STN. We discussed the problems when there are none on the team that really knows how to handle DG.
- b. Will try to be more specific in the future on this
- c. Right now the teams are packing on leg 3 in STN. There are some challenges to sort out what to leave for 2016 at what to bring home.
- d. When all cargo from STN is back in DK, ERF will send the Canadian part to Winnipeg – most likely by ship
- e. ERF will send an updated cargolist, when we have the information from Kunuk after leg 3
