

Minutes from ASP Operations meeting

Date: November 3, 2016

Present: Emmelia Wiley, Carl Isaksen and Egon Frandsen

Absent: Non

Referee: Carl Isaksen

Agenda

1. Cargo
2. ASP Meeting Winnipeg
3. Safety and security for fieldwork
4. Any other business

1. Cargo

Most of all cargo has arrived to Denmark and Canada.

2. Preparation for presentation in Winnipeg and which themes we should have focus on, where discussed and we will take it up to the next meeting the 17th of November
3. We still have a lack of safety and security issues, which we want to have the main focus on, there are too many scientist and students who goes to the field with missing courses etc. We want safety to be the first priority in all types of fieldwork. We need to have some standards you have to follow, and if they aren't accomplished the consequence will be the scientist or student can be rejected to join the fieldwork. One of the big issues is scientist or students for instance come 1-2 weeks before a fieldwork and need the different type of courses. Different types of solutions are being discussed and we are working on for a long term solution.
4. Deck box units are in different locations according to recovery for 2017 and are flexible for shipment etc. when we know the exact dates, ships and participants.
