

## Minutes from ASP monthly meeting

Date: 3 May, 2022

Present: UL, UM, AU, DFO, GINR

Absent: UiT, AWI, KU, NTNU

### Agenda

Farewell to a friend - the passing of David Barber.

- Thanks to David and his huge energy in projects such as; CASES, IPY-CFL, ArcticNet, BaySys, CERCs, C-150, SERF, CMO etc.
- Also gifted speaker that could explain complex science to the public and to policy-makers.
- Visionary scientist that could think big and foster collaboration between research groups.

David leaves a large vacuum and will be missed.

Overview of upcoming calls of common interest in ASP.

*Bring an idea of the upcoming calls (EU and others) to the meeting and let's discuss consortiums and writing plans.*

- AU brought up an idea for joint call expected out in 2024.  
IDEA: HORIZON-CL6-ZERO POLLUTION: Tackling human and climate change induced pollution in the Arctic.

Should we continue ASP in its current format? It is good for networking and joint proposal writing, joint paper writing, but do we need dedicated joint ASP campaigns again? Participate in international organisation of an "Arctic science only" meeting (without politics).?

Søren will reach out to Paul Wassmann on some of his earlier ideas about this.

### Round table:

UM: Working on the CFREF proposal. Busy reorganising after David's passing and backup all projects David was involved in.

UL: Lindcoln Sea project was unfortunately not funded - will try again. Working on the CFI infrastructure project of the two stations (Qik & Pond) in collaboration with locals.

AU: Working on several manuscripts related to oceanography (and carbonate system) in Nares Strait, NE Greenland shelf, Baffin Bay and coastal synoptic cruises - collaboration between AU, UM, GINR. EU contract on GreenFeedBack signed - AU, KU, UiT, GINR, UM and many more. Preparing for upcoming field work in Greenland (East and west Greenland).

DFO: nothing to report this time.

GINR: New ship arrived in Nuuk :) Ready for the upcoming field season.

**Joint Laboratory activities:**

New samples are to be shipped to UL for the inter lab comparison.

Next meeting will be 7 June 2022.

Notes - Søren
